
a
b
c
d
e
stopped utility U
geometric risk q_β
price m
utility lost against the comparison rule
geometric risk q_β of a rule
$m = 1$
$m = 0.3$
$m = 0.1$
constant rates
threshold rules
maximizer of the clipped value
comparison rule
line of slope $\nu = m/(1-\beta)$
price–risk law
its second form
rules within δ of the maximum
bound of Theorem 3
