a
deviation
number of units n
$|q_\beta(\pi_n) - q_\beta(\pi_\mu)|$
ε_n
b
deviation
number of units n
$|V_m(\pi_n) - V_m(\mu)|$
$|V(\pi_n) - V(\pi_\mu)|$
$|U(\pi_n) - U(\pi_\mu)|$
$(m + \bar{u})\varepsilon_n/(1-\beta)$
$(u_- + \bar{u})\varepsilon_n/(1-\beta)$
c
deviation
number of units n
$|p_T(\pi_n) - p_T(\pi_\mu)|,\ T = 10$
$L_0\sqrt{T+1}/(2\sqrt{n\zeta})$
d
relative entropy through T
number of units n
mean
90% quantile
$(T+1)L_0^2/(2n)$
$(T+1)L_0^2/(2n\zeta)$
